

CALIFORNIA BRT PROJECTS

FACT SHEET

Transit Operator: San Joaquin Regional Transit District (SJRTD)
Contact: Donna Kelsay, SJRTD, Phone: 209.948.5566
Project Name:
Project Location: Stockton, CA
Status: In planning; CMAQ funding awarded for preliminary phase

RTD is working with the City of Stockton to incorporate BRT elements in the City's General Plan, which is currently being revised. RTD and the City are working on a BRT Master Plan that will outline potential corridors for BRT implementation in the city and throughout the county. A consultant has been selected and is nearing completion of the Master Plan. A transit map showing future and potential BRT and multimodal corridors has been developed.

Both the City and RTD recently received funding for a Transit Signal Priority (TSP) project along some of the heavily traveled corridors. RTD hopes to implement a pilot project in 2006, with additional corridors selected for more TSP implementation in the future. Future implementation is also contingent upon funding availability.

With regard to BRT on state routes, RTD is planning to have BRT deployed on parts of I-5 and I-205.
